Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: of the prior art references considered, none has disclosed a *digital micro-mirror device (DMD) format conversion system* for outputting a *stereoscopic encoded optical signal* in a format readable within an *image projection display system* employing a *DMD* and a *color wheel*, wherein the *DMD* format conversion system comprises a *3D data formatter* for receiving an *input signal* comprising stereoscopic information having an input frame rate and providing an *output signal* having stereoscopic information and control information that has a *self synchronized output frame rate independent and decoupled from* the input frame rate, a *digital micro-mirror device (DMD) data formatter* comprising a dual port memory controller, a memory device, a digital micro-mirror device data converter and a digital micro-controller, for receiving the output signal having stereoscopic image information and control information from the 3D data formatter and for outputting a *DMD output signal* having stereoscopic image information and control information. The *DMD* output signal having stereoscopic image information and control information including a *color wheel control signal indicative* of rotation rate and *output digital micro-mirror device data indicative* of micro-mirror switching rates wherein the color wheel control signal and output digital micro-mirror device data are *synchronized* based on the output frame rate generated by the 3D data formatter. The

output DMD data is readable by a digital micro-mirror chip. The DMD format conversion system is further comprised in a DMD projection system that further comprise an illumination source for transmitting light to a condensed optics, a rotating color wheel that receives the light from the condensed optics and is coupled to the digital micro-mirror device data formatter, a digital micro-mirror chip for reflecting light from the rotating color wheel, a 3D encoder system for stereoscopically encoded the light reflected from the digital micro-mirror chip and a projection optics for projecting the stereoscopic encoded optical signal, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
